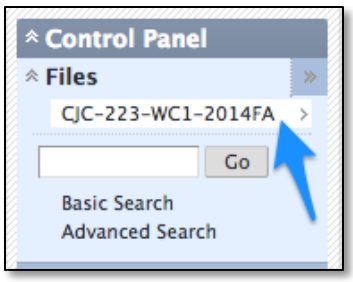
Checking Your Course Size

At SCC, Blackboard courses should be no larger than 100 MB in size. If yours is larger than this, please see our Cyberduck tutorials to house some of your files on our media server.

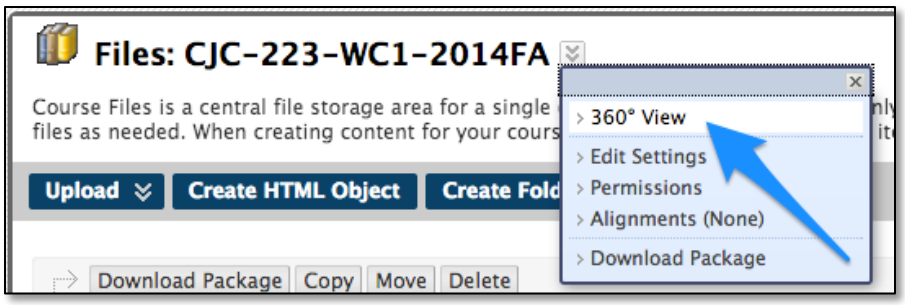
In this tutorial, you will learn how to:

- Determine the size of your Blackboard course

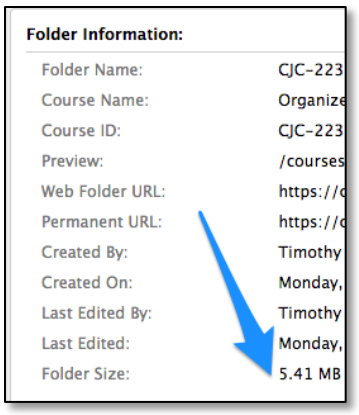
1. Access your course and go to the Control Panel on the left size of the course page.
2. Select “Files” and then click on your course ID number.



3. Click on the action link next to your course ID number, and select 360 View.



4. Find “Folder Size” to locate the size of your course.



If you have further questions, please submit a ticket to SCC E-Learning here.
