Changing the Availability of a Test

If a test or other content item has become unavailable to students due to a time limit set on the item, you may need to make it available again for students to access.

In this tutorial, you will learn how to:

- Change the availability of a test or other item in your Blackboard course.

1. Select the Action Link ( ) next to the content item you wish to make available. (This example is a Test.)
2. Select “Edit the Test Options”
3. Scroll down to the #2 section and change the “Display Until” date to the date you would like. This will not affect the “Due Date” (in #6) but will allow students to see the item after the due date.
4. Click “Submit.”

If you have further questions, please submit a ticket to SCC E-Learning here.
