Add Test Student

Description – In this tutorial, you will learn how to add a test student account to your course. This test account is comparable to a real student account; for instance you will be able to take a test and access discussions. This account will be listed along with the other student accounts within the Grade Center.

Step One

1. Click Course Tools on the left Control Panel
2. In the expanded list, click Add Test Student.
3. On the next screen, click “Yes, enroll Test Student in Current Course.”

*Note the user ID that has been assigned to the account. It will be your Novell ID with an underscore and lowercase “s” tacked on.

4. Add a password.

*If you forget this password or if you need to change it, please contact E-Learning Support.

5. You can now login to your course as a test student.
